

Short Bio: Sumedha Shukla

Sumedha is working as a Research Associate in the Department of Social Science and Humanities, (Economics Division) at IIIT-D. She has done her MSc. in Economics from TERI School of Advanced Studies with a specialization in Resource Economics. She has an undergraduate degree in Economics from Delhi University. Her current areas of interest include health economics, agricultural economics and environmental economics. Sumedha is presently working on problems related to the low uptake of crop insurance in India. She is mildly comfortable with microeconomic and econometric tools and enjoys using these to understand behaviour. Her research expression extends to simplifying government policies and their underlying economics for dissemination via mass media. She also likes to teach mathematics, statistics and environmental economics courses to undergraduate economics students on an online portal. Sumedha spends her spare time cooking and singing.
